

Pandas and Matplotlib topics checklist

Pandas

- Basics:
 - Series and DataFrame creation Dictionary/CSV/JSON
 - Row insertion/deletion/modification
 - Column insertion/deletion/modification
 - Accessing
- Subsetting:
 - Filtering [X==Y]
 - Using '&' and '|' (*and* and *or*) logic for filtering
 - Queries
 - Returning elements
- Methods
 - Sorting
 - Arithmetic (groupby, sum, mean,...)
 - Fillna, drop
 - Function Apply
 - Summarizing
 - Computing Descriptive Statistics
 - Mapping

Matplotlib

- Handling X and Y axis:
 - Treating your data for plotting function
- Types of plots and when they fit better
 - Dots
 - Lines
 - Bars and grouped bars
 - Other types of plots
